

Successful Completion of the "WeGebAU" Project

By reason of the economic crisis in 2009, during the period of short-time work and bad order situation, the idea arose to provide further training to low-skilled employees in our company in line with the Employment Agency ("WeGebAU" programme).

By means of subsidies of the Employment Agency, the good cooperation with the Southern Upper Rhine Chamber of Industry and Commerce, the organization for youth, social and educational work "Internationaler Bund", and the vocational school Georg-Kerschensteiner in Müllheim, we were enabled to offer vocational retraining for 15 employees (one warehouse specialist, two administrative assistants and twelve manufacturing mechanics).

The 2 years of retraining were pretty turbulent; a lot of initiative and commitment from all parts were required during this time. Our praise and recognition apply primarily to our retrainees – adults who dared the step to attend lessons again, do homework and prepare for class tests.

We would like to take the opportunity to congratulate them cordially on their successful completion. Furthermore we are extraordinarily proud of them as in addition to the daily training and work life they had to care for their families, as well.

We wish our retrainees all the best and a lot of success for their personal and professional future. We are looking forward to an ongoing excellent collaboration.

The official closing ceremony of the retraining took place on 30 September 2011 at MSC Freiburg. Since the technical examinations had been carried out in the production of MSC Freiburg, all could toast relieved to the completion.

The completion has been celebrated adequately together with representatives of the Employment Agency, the organization "Internationaler Bund", the vocational school teachers, the examination committee and the Southern Upper Rhine Chamber of Industry and Commerce.

The unofficial closing ceremony took place on Wednesday, 5 October 2011 in a smaller scale in the restaurant coucou in Freiburg.
