

New trainees start their apprenticeship on September 1st, 2011

We would like to cordially welcome our new trainees Tim Groehn und Niklas Häberlin at MSC Freiburg GmbH.

They will be trained in our house for a period of 3.5 years to become electricians for hardware and systems.

Apprenticeships and trainings are very important for our company. We are pleased to be able to offer two young people an apprenticeship training position and hereby work actively against the lack of specialised workforce.

We wish both of them all the best and that they may enjoy the time and have a lot of success.

Education and training is our passport to the future and tomorrow belongs to those who prepare today for it.
